Corporate scope GSK will issue one report for each country showing all Transfers of Value made to HCPs / HCOs in that country by GSK, GSK Consumer Healthcare, and by ViIV Healthcare. Reporting date GSK has defined two types of Transfers of Value for Reporting Date purposes: - a Monetary Transfer of Value is a payment of money made to an HCP/HCO by GSK either directly or through an intermediary (for example, fees for service). The Reporting Date for these Transfers of Value will be the actual payment date, irrespective of when the event happened (for example, when a consultancy fee is paid, not when the work took place). - a Non-monetary Transfer of Value is a benefit received from GSK either directly or through an intermediary without a monetary payment (a flight or a fee paid to a travel agent or events organiser, for example). The Reporting Date for these Transfers of Value will be the event date (for example, when the congress took place). Value Added Tax GSK has taken the decision to report values including VAT wherever possible due to the complexity of VAT regimes around Europe and the inconsistency of whether VAT may or may not be reimbursable depending on where the transaction took place. The report will show all values in the currency of the country in which the report is made. Currency GSK records Transfers of Value in the currency of the country in which the report is made. GSK considers that it would be inappropriate to the disclose an employee' salary, bonus, expenses and benefits. Novartis On 2 March 2015, GSK and Novartis completed a three part transaction, as a result of which GSK acquired Novartis' global Vaccines business (excluding influenza vaccines); created a new world leading Consumer Healthcare joint ventu	Term	Definition
